

Production Head – Wellington

We are looking for a skilled and passionate Production Head to lead and manage our horticulture production operations. The ideal candidate will have strong technical expertise in propagation, fertigation, irrigation systems, growing media, pest and disease management, and ornamental and indoor plant production

Requirements:

- Diploma or Degree in Horticulture
- Minimum 5 years' experience in horticultural production
- Strong knowledge of:
 - Fertigation and irrigation systems
 - Growing media and substrate management
 - Plant propagation techniques
 - Integrated Pest Management (PM)
 - Ornamental and indoor plant environment

Responsibilities:

- Oversee all aspects of horticulture production and nursery operations
- Manage young plant propagation and ensure high-quality plant development
- Develop and monitor fertigation and irrigation programs for optimal plant growth
- Formulate and manage growing medium compositions and planting schedules
- Implement effective pest and disease control strategies, including Integrated Pest Management (PM)
- Supervise ornamental and indoor plant production to meet quality and market standards
- Monitor plant health, environmental conditions, and productivity efficiency
- Lead and train production teams to ensure productivity and best horticulture practices
- Maintain production records, inventory, and operational reports
- Ensure compliance with health, safety, and environmental production
